McGILL UNIVERSITY | MONTREAL, QUEBEC | SEP 03 2008

## Melamed answers "Now what?" Question for graduating students

Howard Melamed, CEO and President of the multinational telecommunications service company CellAntenna Corporation, author of *The Science of Opportunity* and a McGill engineering alumnus (Eng'80) will be giving a talk on Sept. 10 entitled "The Science of Opportunity: Making Career Decisions That Work." The talk will be addressed to all McGill students in their final year and will address some of the questions they have regarding choosing a career and what to do next.

Howard Melamed

"I think that the main issue for students is the same as it was when I was a student - 'what on earth am I going to do after I graduate?'" says Melamed. "The pressures of life, including searching for a job and making the right decisions, are enough to worry any anyone. No matter how good anyone may be in school, schooling by itself cannot guarantee you success."

Howard Melamed; Sept. 10, 5:30 p.m. McConnell Engineering Building, Rm 11; 3480 University St. RSVP at <http://engineering.myfuture.mcgill.ca>
